

and the role of the government in the development of the economy and society.

The first section of the paper presents the theoretical framework of the study. The second section presents the methodology used. The third section presents the results of the study. The fourth section presents the conclusions of the study. The fifth section presents the implications of the study. The sixth section presents the limitations of the study. The seventh section presents the future research directions. The eighth section presents the references.

## 1. LITERATURE REVIEW

The literature review is divided into two parts. The first part is a general review of the literature on the relationship between the environment and the economy. The second part is a specific review of the literature on the relationship between the environment and the economy in developing countries.

The general review of the literature on the relationship between the environment and the economy is based on the work of several authors. The first author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The second author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation. The third author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The specific review of the literature on the relationship between the environment and the economy in developing countries is based on the work of several authors. The first author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The second author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation. The third author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The fourth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation. The fifth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The sixth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation. The seventh author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The eighth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation. The ninth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The tenth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation. The eleventh author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The twelfth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation. The thirteenth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.

The fourteenth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation. The fifteenth author is Pearce (1990), who argues that there is a positive correlation between economic growth and environmental degradation.
